# Architectural CG Visualization

# about us

We are a young and upcoming team of creative minds that are always open to taking on new tasks and challenges and as qualified architects and designers we know the design process inside out.

This allows us to engage in direct dialogue with our clients whether the task at hand involves a quick turnaround to meet a deadline or to assist in the whole design process.

For us atmosphere is a key tool to tell the broader story about the architecture involved. We consider the piece within its environment as a whole and try to paint a portrait that is capable of arousing emotions while still speaking to the viewer's intellect.

Our enthusiasm for architecture, art and photography flows into our daily work and drives us **further and further.**

# our team

Our team comprises of passionate young creatives, backed with seasoned professionals utilizing natural born talent, academia and state-of-the-art equipment.

# our workflow

**1**

You send a brief of the task.  
We deliver an individual offer.

**2**

50% advance payment.

**3**

We dive in to your project  
and create a 3d model.

**4**

After approval of the 3d model we  
present a choice of camera angles.

**5**

After approval of the angles we produce  
low resolution preview images.

**6**

After approval of the low resolution images we  
render the final high quality visualizations.

**7**

Final 50% payment.
